

About Groupe Gorgé

Established in 1990, Group Gorgé is an industrial group operating in different areas of expertise:

Smart Safety Systems – Using technology to work in risk environments;

Protection in Nuclear Environments – Protecting people and securing buildings operating with radioactive materials;

Industrial Projects & Services Conducting Robotics and Fire protection systems projects for industry and service-sector player;

3D Printing – Enabling major industry players to find new routes to successful innovation and production processes by providing systems, 3D printers and new premium material.

In 2014, the Group reported revenue of €223.3 million. It is backed by 1,370 employees and operations in over ten countries.

Prodways[®] ProMaker L5000 3D printer, utilizing MOVINGLight[®] and Texas Instruments DLP[®] technology, to be displayed at Photonics West

Texas Instruments (TI) DLP[®] Products will exhibit its advanced light control solutions at Photonics West, from February 16-18th in San Francisco and will display Prodways[®] ProMaker L5000 DLP technology enabled 3D printer using MOVINGLight[®] technology at booth #823.

TI's award-winning DLP technology offers advanced light control capabilities driving innovation for digital lithography, machine vision, 3D printing, spectroscopy and other industrial applications. The DLP digital micromirror device (DMD) is an electrical input, optical output micro-electro-mechanical system (MEMS) device that allows developers to perform high speed, efficient and reliable spatial light modulation.

For more than 15 years, TI DLP technology, combined with high power LEDs, allows Prodways[®] proprietary and disruptive MOVINGLight[®] technology to print hundreds of millions of pixels per layer with high precision in all 3 dimensions at large production volumes. MOVINGLight[®] is now well-established as premium system of UV photo-polymerization allowing simultaneously unparalleled quality of the produced parts and distinctly improved production performance, up to 10 times faster than market standards, for a wide range of industrial and biomedical additive manufacturing applications.

Thanks to its unique 365nm wavelength, the UV polymerization of liquid resins, ceramic pastes and composite resins charged with ceramic, metal, fiber or nanoparticles provides Prodways with the means to meet a wide range of industrial and medical additive manufacturing applications.

Groupe Gorgé – Nathalie LAGOS – Communication Manager – Tél. : +33(0)1 44 77 94 86 – E-mail : n.lagos@groupe-gorge.com

To underline this collaboration, TI will display a ProMaker L5000 using MOVINGLight® technology at booth #823 at Photonics West that will take place from **February 16-18th** at Moscone Center ABC South Hall in San Francisco.

Raphael Gorgé, Chairman of Prodways states, “With MOVINGLight® technology, we are convinced that we are offering the market the perfect technology at the perfect time. This advantage, coupled with our ambition, efforts in R&D, and recent launch of our new complementary laser sintering range will allow us to establish Prodways as a key multi-technology player in 3D printing.”

About Prodways

Prodways, a subsidiary of Groupe Gorgé, assists major industrial firms with innovations and production processes by providing high-end solutions for additive manufacturing. Prodways’ strategic positioning is to combine the necessary technological solutions with the capacity to provide services and support necessary to help companies develop and meet industrial challenges by:

- providing a top-quality, state-of-the art industrial solution
- providing a complete range of technologies to meet their needs in terms of productivity and reliability
- developing materials suited to industrial constraints (mechanical properties, biocompatibility, flammability etc.)
- proposing product design and engineering and consulting on production technologies and processes
- qualifying business processes beforehand by creating test parts and process simulations
- proposing manufacturing solutions for back-up and peak reduction
- investing in innovative players in the 3D ecosystem.

Prodways is now one of the few players able to overcome all industrial challenges and boost the emergence of additive manufacturing in series production. Prodways’ offer is backed up by additional activities that enable it to position itself as a serious rival to the two global market leaders and also become the only company outside the USA to offer clients a wide range of 3D printing technologies and a complete range of 3D printing services.

Disclaimer

This press release could contain statements on past events and forward-looking statements including statements regarding future goals or targets. Forward-looking statements reflect current expectations for results and future events.

Such forward-looking statements and targets depend on known and unknown risks, uncertainties and other factors that may cause actual results, performance or events to differ materially from those anticipated herein. All these risks and uncertainties could affect the Group's future ability to achieve its targets. Risks, uncertainties and other factors that could cause actual results to differ materially from the results anticipated in the forward-looking statements and targets include, among other things: the risks and uncertainties possibly mentioned in this press release; the strength of competition; the growth of the market; currency fluctuations; interest rate fluctuations; raw materials and freight price fluctuations; armed conflicts or political instability; control of costs and expenses; changes in tax legislation, rules, regulation or enforcement; our ability to successfully keep pace with technology changes; our ability to attract and retain qualified personnel and key-men; the evolution, interpretation and uniform application and enforcement of International Financial Reporting Standards (IFRS), according to which we prepare our financial statements; supply chain bottlenecks; the performance of our business partners (subcontractors, agents, suppliers, etc.).

Some of these risk factors are set forth and detailed in our Document de Référence (Registration Document including the annual financial report filed with the French Autorité des Marchés Financiers). This list of risks, uncertainties and other factors is not limitative. Other non-anticipated, unknown or unforeseeable factors could also have material adverse effect on our targets. The Group expressly disclaims any obligation or undertaking to update or revise any forward-looking statements or targets potentially contained in this press release to reflect any change in events, conditions, assumptions or circumstances on which any such statements are based.
